(a) Levelled railhead points (tilt 0.37 deg), colour = rail group (points closer than 0.2 m)

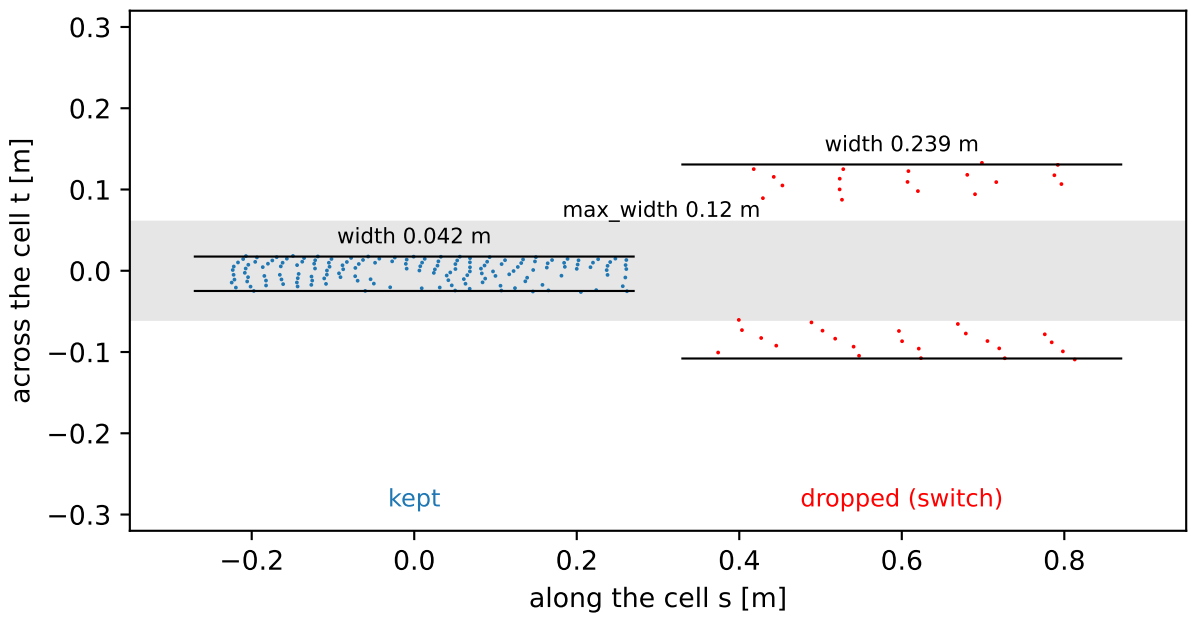

(b) Switch area: 5 m pieces with their PCA direction (black), cells along each piece

(c) Curve: followed piece by piece

(d) Two cells in their own PCA frame, width = 2 to 98 % of t

(e) Width of all cells: 443 kept, 46 dropped (single railhead: median 0.042 m)
