Rail height precision per segment, criteria (dashed) and limits (triangles)
QC Int.1/3, 48-60 km/h
QC Int.2, 48-60 km/h
Change, VBZ 2 sigma (height)
Change, strict two-sided (height)
FARO, bridge
RTC360, bridge
RTC360, tripod
rail height precision sigma_z/sqrt(n) [mm]
horizontal distance d [m]
incidence angle theta [deg]
